# Sports & Recreation at Stantec

From community recreation to professional play, sport can transcend boundaries, unify nations, build community spirit, improve health and enrich lives. The facilities where we play and practice should enhance this experience—igniting passion, promoting opportunity, and building character.

In sports, teamwork is essential. At Stantec, we believe that applies to our work as well. We create teams of architects, engineers, and landscape architects who work together to deliver world-class facilities. Our specialists' expertise covers every phase of athletic facility design, from exploring

funding options and gathering constituent input, to project design and construction administration. We're focused on the full spectrum of sports and wellness planning and design for large stadiums and arenas, athletic fields and courts, ice skating rinks, skate parks, and community centers.

We bring our "A game" to capture the energy and passion of sport. We aim to elevate the experience for athletes and spectators so that athletics have an ideal stage to engage, excite, and inspire on a community, regional, and global scale.

Teamwork  
is essential  
in sports.  
It's also  
essential to  
good design

Stantec's Sport Group is a specialized team of designers who focus on athletic services. With our team based across Stantec's 400 offices throughout North America and internationally, we're able to draw upon each other's national expertise, as well as our understanding of the local communities. We call on that knowledge and passion to provide our clients with a broad set of services.

- Stadiums
- Fields
- Skate Parks
- Bike Facilities
- Aquatic Centers
- Ice Facilities
- Parks & Recreation
- Wellness Facilities
- Indoor Facilities & Field Houses

# Sports & Entertainment

Stadiums breathe life into our communities. They are the beating hearts of excitement, unity and purpose, where people come together to play and watch, making life-long memories along the way.

From America's football fields to cricket pitches in India, from the collegiate level to the professional leagues, from man-powered competitions to motor-powered races—Stantec plans and designs all facets of stadium projects of all scales. Whether it's a local amateur game or the Super Bowl, we design the way fans get to the event, the architecture that supports the crowd and the field where the athletes play. We design the wayfinding that helps ticketholders find their seats with ease, the operations that keep the stadium running, the options for revenue generation today and tomorrow, and the branding that makes a stadium not just a building, but an indelible icon.

Our team has worked with the NFL, MLB, NHL, CFL, MLS, CIS, and NCAA to create transformative and innovative stadiums that draw on the passion of fans and the determination of athletes, creating unforgettable experiences.

## 500K

Seeing 500,000 guests within the first two months, Sports Magazine has named Rogers Place, Edmonton's new award-winning and LEED Silver Certified arena/events center, one of the best NHL arenas in the world.

# Recreation

Whether it is a community center, field house, recreation center, or seasonal structure, these facilities were made to bring people together and restore play to our communities. These diverse, adaptable, and multi-purpose facilities become anchor points for the community – promoting wellness, physical literacy, and social vibrancy – day and night, all year long. We've designed hundreds of community and recreational centers throughout North America, each one with a unique reflection of the community it supports. We've assisted athletic departments with installations at several Ivy League schools, such as Harvard Stadium and Penn Park at the University of Pennsylvania. With multi-purpose functionality, these facilities can restore a community's sense of play, while also giving them a safe place during natural disasters and a home away from home.

## DESIGN WITH COMMUNITY IN MIND

Communities are fundamental. Whether around the corner or across the globe, they provide a foundation, a sense of place and of belonging. That's why at Stantec, we always design with community in mind.

We care about the communities we serve—because they're our communities too. This allows us to assess what's needed and connect our expertise; to appreciate nuances and envision what's never been considered; to bring together diverse perspectives so we can collaborate toward a shared success.

We're designers, engineers, scientists, and project managers innovating together at the intersection of community, creativity, and collaboration. Balancing these priorities results in projects that advance the quality of life in communities across the globe. Stantec trades on the TSX and the NYSE under the symbol STN. Visit us at [stantec.com](http://stantec.com) or find us on social media.
